SKILLS

HTML	CSS/SCSS/Tailwind
JavaScript	TypeScript
React	Next.js
Redux Toolkit	Zustand
Jotai	Node.js
Firebase	PostgreSQL
Payload CMS	Git

PROJECTS

Pulse Mate
Mar 2025 - May 2025

Health tracking app with manual input for pulse, blood pressure, and other metrics. Features interactive charts and analytics to visualize trends. Allows users to add personal notes for symptoms and lifestyle. Designed for easy and proactive health monitoring.

VM GameBot
Aug 2024 - Dec 2024

Multiplayer game-themed Telegram bot for group chats with 100+ concurrent users. Built a responsive Next.js web interface for game management. Used Firebase for real-time data and authentication. Implemented bot logic with Node.js and Telegraf.js for smooth Telegram integration.

7K

Developed a web-based casino platform with various interactive games. Implemented coin games for fast-paced gameplay and slot machines with different themes. Designed a user-friendly interface for seamless player experience. Worked on game mechanics, rewards, and in-game transactions.

EMPLOYMENT

Full Stack Developer   Oct 2024 - Present
Appexoft, Lviv

- Developed scalable web applications using Next.js, integrating AI solutions to enhance user experience
- Built interactive map features using Mapbox for geolocation and data visualization
